Name: Faizan Toheed
Id: F2024332018
Course: OS lab
Section: D3

Q1: Create a folder with your name and id like jenny-F2120219874..

Answer: I used mkdir to create the folder with my name and Id.

Q2: Create 5 sub-folder in it

Ans: I used mkdir -p to create all the folders at once mkdir -p a/b/c is used to create nested folders/directories

Q3: Show me the structure of the folders recursively

Ans: By using the command cd -R. All the hierarchy has been shown above in the image.

Q4: Create a file using nano in the folder # 03, and write up your intro..... upto 2 lines

Ans: First I went to folder 3 using a command cd ./folder1/folder2/folder3 and after confirmation firm pwd i create the text file by using the nano command

Q5: The content you saved in the "nano" file, display that content on the console/cmd

Ans: I do ctrl + S to save and ctrl + X to exit and then used the cat command to display the content of the text file.
